

Results to include in the paper

Tuesday, June 30, 2020 3:50 PM

1. Plot R vs average target utility for smart algorithm (compare with greedy, this comparison might be unfair)
2. Plot R vs average vehicle utility (compare with greedy, more appropriate to compare here)
3. Spatial coverage (variance in number of visits)
 - a. Plot R vs variance of target utility for smart and greedy
4. Road utilization
5. Maybe: Target utility vs vehicle utility
